

SIMMERRING MSS 7 (MODULAR SEALING SOLUTION)

Simmerring MSS 7

PRODUCT DESCRIPTION

The standard Simmerring BA...U...SL combined with a rubberised slip ring with axial dust lips as one-piece solution. A proven sealing system with high resistance to soiling, water and external environmental conditions and a counter-surface customised for the Simmerring.

PRODUCT ADVANTAGES

- Broad range of applications
- Reliable sealing of the housing bore, even with increased roughness of the bore, thermal expansion and split housings, thus a sealing of low viscosity and gaseous media also possible
- Additional axial dust lip(s) against moderate to medium dust and dirt ingress from outside

PRODUCT PROPERTIES

- Outer casing: elastomer
- Spring-loaded sealing lip
- Additional dust lips
- Modern sealing lip profile
- High resistance to dirt ingress
- Robust solution
- Grease between the sealing lip and dust lip with special lubricant Klüber Petamo GHY 133 N

APPLICATION

- Sealing of special gearboxes (e.g. automated washing system/car wash)
- Axles for agricultural and construction machinery
- Axles for special vehicles
